PROFILE

Computer Science graduate with hands-on experience turning raw operational and CRM data into actionable insight — analyzing conversion funnels, sales stages, and drop-offs using SQL and Tableau. Has independently shipped three full-stack products end-to-end, giving direct experience translating operational problems into clear product requirements rather than just observations. As an early-stage startup's first hire, built a candidate intake and lead-tracking workflow from a completely blank slate. Currently in an Operations role at Airlearn, working cross-functionally and learning how operational bottlenecks actually get resolved day to day. Comfortable working close to messy, real-world data and real users rather than at an abstract distance from either.

SKILLS

- Data & Funnel Analysis: SQL (HackerRank Advanced-certified), Tableau Public, Excel, Power BI, funnel/drop-off analysis, data cleaning and validation
- Product: Translating operational problems into product requirements, user stories, MVP scoping, workflow design
- Operations: CRM/lead tracking, process design from scratch, cross-functional coordination, stakeholder communication
- Technical: Python, JavaScript/TypeScript, Angular, FastAPI, PostgreSQL, REST APIs, Google Gemini API integration (shipped in production)
- AI-Native: Claude, ChatGPT, prompt engineering — Anthropic AI Fluency & Prompt Engineering certified

PROJECTS

CRM Sales Pipeline Analysis — *Data Analysis Project*

- Cleaned and validated CRM sales-opportunity and sales-team datasets (8,800+ opportunities, \$10M+ in tracked revenue), then used SQL and Tableau to build an interactive dashboard covering revenue, win rate (48.16%), sales stages, monthly trends, and agent performance to pinpoint where deals were dropping off

[GitHub](#)

Ascendra — Career Management Platform — *Live Full-Stack SaaS, Built Solo*

- Identified a fragmented job-search tracking journey through personal experience; wrote requirements and user stories, then built and shipped the solution solo (Angular, FastAPI, PostgreSQL) — solidified the core pipeline workflow first, deliberately deferring AI features until that foundation was reliable

[Live Product](#) | [GitHub](#)

DollarDairy — Personal Finance App — *AI-Powered, Mobile*

- Integrated Google's Gemini API so users can query spending in plain language (e.g. "how much did I spend on food this weekend?") instead of navigating rigid dashboards

[GitHub](#)

HikerNet — Community Trekking & Trail Discovery — *Mobile Product*

- Scoped core user journeys for trail discovery and group coordination and built the mobile MVP (React Native, Node.js, MongoDB), self-teaching Figma to design the interface — chose a flexible schema to accommodate evolving user-generated trail data

EXPERIENCE

Operations Intern — Airlearn (*Unacademy-backed*)

Sept 2026 – Present

- Work cross-functionally across content, product, and internal teams within a live consumer product organization, gaining first-hand exposure to how operational bottlenecks are identified, escalated, and resolved day to day

Consultant (Part-time) — Admigo Overseas & Careers — Kochi

Jun 2026 – Jul 2026

- Joined as the founder's first hire with no existing process; designed and built a lead-tracking workflow from scratch — logging status, following up, and qualifying leads before they reached the founder — running roughly 30 candidates through it

Python & Data Science Intern — QSpiders Global Connect

Jun 2026 – Aug 2026

- Worked hands-on with Python and data science tasks — data preprocessing, cleaning, analysis, and scripting on real datasets — building the analytical foundation now applied to CRM and operational data

Academic Learning Consultant — YoursTutor — Remote EdTech

Jan 2024 – Jun 2026

- Diagnosed knowledge gaps and adapted learning plans for 10+ students over a 2+ year engagement, maintaining full retention — direct experience identifying where users get stuck and adjusting the approach in response

Social Media & Influencer Marketing Intern — *Nomad Gifts* — *Kozhikode* Jun 2023 – Nov 2023

- Managed creator outreach and end-to-end campaign deliverables; analyzed campaign performance data to identify high-engagement creator segments and optimize marketing spend

ADDITIONAL PROJECTS & LEADERSHIP

- WordPlay — Voice-First Vocabulary Coach: Built a conversational AI coach (Vapi, WebRTC, prompt engineering) giving learners real-time spoken practice and feedback, prioritizing natural turn-taking over traditional flashcard drills
- Machine Learning & AI Intern, KELTRON (Kerala, 2025): Applied ML workflows, data preprocessing, and model evaluation in a structured engineering environment
- Cybersecurity Intern, Kerala Police Cyberdome (Kerala, 2025): Hands-on exposure to threat analysis and security operations in a law-enforcement environment

CERTIFICATIONS

- SQL (Advanced) — HackerRank — Jun 2026
- AI Fluency Framework & Foundations — Anthropic — Jun 2026
- Claude 101 — Prompt Engineering — Anthropic — Jun 2026
- Python & Data Science Program — QSpiders Global Connect

EDUCATION

B.Tech, Computer Science — Government Engineering College, Wayanad May 2026

CGPA: 8.34 / 10.0 | No backlogs or arrears

12th (PUC) — 99% | 10th (SSLC) — 100%
